

AMENDMENT(S) TO THE CLAIMS

1. (Currently Amended) A method of using a print device, comprising the steps of:
transmitting an email over a network; and
generating a transmission report at said print device, said transmission report including an
indication of success or failure of acceptance at a primary SMTP gateway of said email
5 transmission.

2. (Original) The method of claim 1, wherein said transmission report includes a
thumbnail image associated with said email upon a successful transmission of said email, and said
transmission report does not include a thumbnail image associated with said email upon an
unsuccessful transmission of said email.

5 3. (Original) The method of claim 2, wherein said thumbnail image comprises an image
associated with said email.

4. (Original) The method of claim 3, wherein said image comprises one of a scan job and
a fax job associated with said email.

5. (Original) The method of claim 1, wherein said transmission report includes upon said
failure at least one of a primary SMTP gateway IP address, an indication of said failure, a number
of tries of said transmission, and a mail server response.

6. (Original) The method of claim 1, wherein said email includes an attachment.

7. (Original) The method of claim 6, wherein said transmission report includes a thumbnail image of said attachment.

8. (Original) The method of claim 6, wherein said transmission report includes a thumbnail image of said attachment upon a successful transmission of said email, and said transmission report does not include a thumbnail image of said attachment upon an unsuccessful transmission of said email.

5

9. (Original) The method of claim 6, wherein said attachment comprises one of a scan job and a fax job associated with said email.

10. (Original) The method of claim 9, wherein said transmission report comprises information relating to said attachment, including at least one of a file name, data format, and image resolution.

11. (Original) The method of claim 1, wherein said generating step includes the substep of printing said transmission report with said print device.

12. (Original) The method of claim 1, wherein said transmitting step includes transmitting said email using one of said print device and a computer attached to said network.

13. (Currently Amended) A method of using a print device, comprising the steps of:
transmitting an email; and

generating a transmission report at said print device, said transmission report including a thumbnail image associated with said email upon a successful transmission of said email, said
5 successful transmission being defined as acceptance of said email at a primary SMTP gateway,
and said transmission report not including a thumbnail image associated with said email upon an unsuccessful transmission of said email.

14. (Original) The method of claim 13, wherein said thumbnail image comprises an image associated with said email.

15. (Original) The method of claim 14, wherein said image comprises one of a scan job and a fax job associated with said email.

16. (Original) The method of claim 15, wherein said transmission report includes at least one thumbnail image associated with said email upon a successful transmission of said email, each said thumbnail image corresponding to a different page of said scan job or fax job.

17. (Original) The method of claim 13, wherein said generating step includes the substep of printing said transmission report with said print device.

18. (Original) The method of claim 13, wherein said transmitting step includes transmitting said email using one of said print device and a computer attached to said network.

19. (Currently Amended) A method of using a print device, comprising the steps of:
transmitting an email over a network; and

generating a transmission report at said print device, said transmission report including information pertaining to said email including an indication of success or failure of acceptance by a primary SMTP gateway of said email.

20. (Original) The method of claim 19, wherein said transmission report includes an indication of success or failure of said email transmission.

21. (Original) The method of claim 20, wherein said transmission report includes a thumbnail image associated with said email upon a successful transmission of said email, and said transmission report does not include a thumbnail image associated with said email upon a failure of said email.

22. (Currently amended) The method of claim 20, wherein said ~~automatically~~ generating step includes the substep of printing said transmission report with said print device.

23. (Original) The method of claim 19, wherein said transmitting step includes transmitting said email using one of said print device and a computer attached to said network.
